MICRO TEACHER

FEATURES

- Easy to carry. Designed small enough in your pocket or Guitar Cases. Whenever you can enjoy guitar performance.
- Micro teacher is suitable for your tuning amplifier.
- Superior and powerful sound quality is provided by using with your external speaker.
- External DC Jack for AC adapter (9VDC).

OPERATION

- (1) Connect the input jack to the instruments. The unit switches on when a plug is inserted into the input jack.
- (2) Volume control
Controls volume. Turning knob CW increases volume.
- (3) Tone control
Controls tone. Turning knob CW increases treble.

(4) External Speaker

By connecting to your external speaker.

(5) External DC Jack.

The GA10 can be externally powered by the "AC-9" 9VDC adapter.

(6) Changing the battery

To change the battery, remove the four screws on the bottom of the unit and take off. To avoid damaging the screws, use the proper screwdriver.

NOTES

- Unplug the instrument when not in use.
- When storing the GA10 for long periods of time, remove the battery.
- You will hear some loss of level and distortion when the battery begin to run down.
- When using external power source, it is not necessary to disconnect the battery. Switching is automatically accomplished internally.
