COMPRESSOR

CP-830

"IBANEZ" Compressor CP-830 is an attachment which sustains the output volume control level by controlling amplification automatically according to the level of El. Guitar. The wide dynamic-range and great capacity of maximum sensitivity makes "IBANEZ" Compressor superior effect of non-distortion sustain which extends exactly your original sound of El. Guitar. The case made from durable portable aluminum-diecasting for easy carrying.

HOW TO OPERATE THE IBANEZ COMPRESSOR

- 1) Connect the output of your guitar to the instrument jack of the Compressor. This turns on the electric circuit.
- 2) Turning the Sustain knob clockwise will increase the rate of sustain time. Control sustain time according to the performance.
- 3) The level knob controls the level of sustain. Control the level to be in the ratio 1:1 for normal and effect sound.
- 4) This Compressor can be changed from effect to normal by simply pushing the switch.

IMPORTANT

9-volt battery is available for approximate 100 hours. To avoid unnecessary battery drain, unplug the instrument when not in use. When storing the "IBANEZ" Compressor for a long time, disconnect the battery.

TO CHANGE THE BATTERY

Remove the four screws on the bottom cover of the Compressor. The battery is connected with a convenient battery snap.

SPECIFICATIONS

Control Sustain time	1
Sustain level	1
Normal/Effect	1
Battery	006P 9V
I. C.	1
Transistor	3
Photo-coupler	1
Size	4 $\frac{5}{8}$ " x 2 $\frac{3}{8}$ " x 2"
Weight	10 oz.
