Phase Tone II

PT-707

The Ibanez Phase Tone II is a highly developed electronic phase shifter which will add a new dimension to the sound of any electric guitar, bass, piano, organ, synthesizer or vocal system.

The Phase Tone II has a very wide dynamic range with very low distortion and versatile controls.

In addition to a phase speed control, the Phase Tone II offers a phase depth control for phase effects from subtle to ultra-dramatic.

The Phase Tone II is also compatible with the Ibanez **PS-901** AC adaptor and power supply, eliminating the need to replace batteries.

OPERATION

1. INSTRUMENT :

A switch is incorporated into the input jack to turn on the circuit when the instrument is plugged in.

2. AMPLIFIER :

Connect the amplifier jack to your amplifier input with a guitar cable.

3. FOOTSWITCH :

Pushing the footswitch turns the phase effect on and off.

4. PHASE SPEED :

Turning the knob clockwise increases the rate of phase shift.

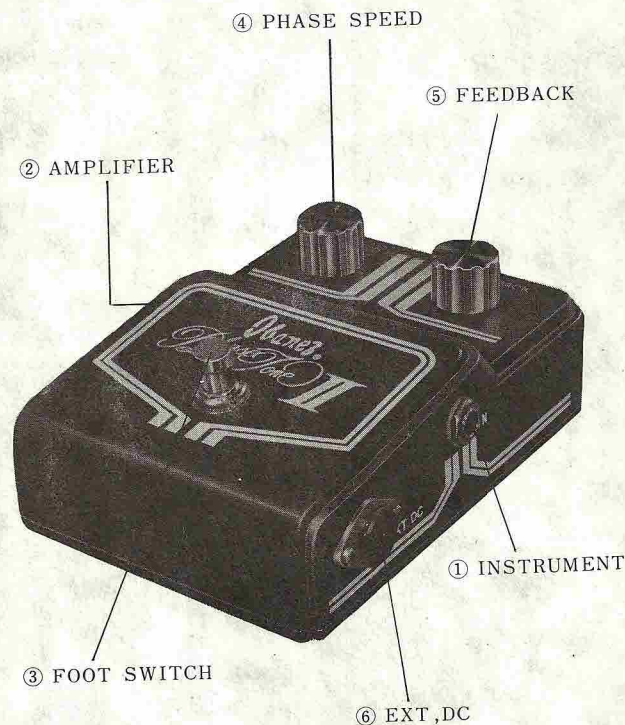

5. FEEDBACK :

Turning the knob clockwise increases the presence of the phase effect with accentuated highs and lows.

6. EXT. DC :

When using AC power, remove the small cap and connect the Ibanez **PS-901** adaptor.

OPERATION

NOTES

1. Use a long-life type battery.
2. Unplug the instrument when not in use.
3. When storing for long periods, remove the battery.
4. When using battery power, don't remove the small cap for DC.
5. For AC operation, use only the Ibanez **PS-901** adaptor.

To change the battery, simply remove the four screws from the back cover and replace the old battery with a fresh one (use long-life type).

Make sure the battery connector is firmly fastened before replacing the cover.

SPECIFICATIONS

| | | |
|-------------------|--|--------|
| Control : | Phase speed | 1 pc. |
| | Feed back depth | 1 pc. |
| Foot switch : | Normal/Effect | 1 pc. |
| Semi conductors : | IC | 4 pcs. |
| | Transistor | 4 pcs. |
| | Diodes | 2 pcs. |
| Battery : | 006P 9v (long life) | 1 pc. |
| Size : | 6" × 4 $\frac{3}{4}$ " × 2 $\frac{1}{3}$ " | |
